Exercise n°1		(5 points)
Exercise n°2		(9 points)
Exercise n°3		(11 points)

1 The package pictochrono

1.1 Ideas

The idea is to display a pictogram like "chronometer" to present times for exercises, for example. The pictogram can be inserted inline with automatic height and vertical offset, or with a manual height and offset.

1.2 Loading

The package loads within the preamble, with `\usepackage{pictochrono}`.

The only loaded packages are `simplekv`, `calc`, `simplekv`, `xstring`, `etoolbox` and `tikz` (with `calc` library).

```
\usepackage{pictochrono}
```

2 The command

2.1 Usage

The command is `\pictochrono`.

```
\pictochrono[keys]{duration}<v.align>
```

The optional keys are :

- the key `Height`:
 - can use an automatic height, with `auto` (by default, global height of current font qB + small vertical offset);
 - can specify a global height;
 - the `Strut` key can adjust characters box automatic height;
- the key `Color` for the main color (`black` by default);
- the key `ColTime` for the color of duration, if specified (`lightgray` by default);
- the key `Delta` for the graduations of minutes (within 0/5/10/15/20/30) (`5` by default);
- the key `Offset` for manual vertical offset (`auto` by default);

The mandatory argument, between `{...}`, is the duration to be displayed.

The optional argument, between `<...>`, can specify a vertical alignment of the pictogram (within `vcenter/vbottom/vtop`, or empty for default positioning).

2.2 Examples

```
%automatic inline insertion (with an without 'Strut' key)  
This is a test, with a \pictochrono{25} minutes chronometer, or  
(\pictochrono[Strut=()]{25}).
```

```
This is a test, with a 🕒 minutes chronometer, or (🕒).
```

```
%automatic inline insertion, with user colors.
{\Huge This is an other test, with a
\pictochrono[Delta=15,Color=blue,ColTime=red]{20} minutes chronometer.}
```

This is an other test, with a  minutes chronometer.

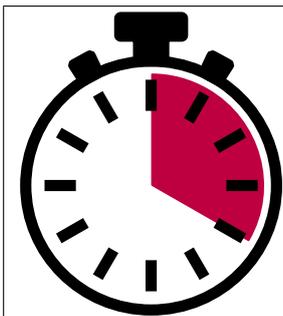

```
%manual inline insertion, with manual offset.
This a \pictochrono[Height=3em,Offset=-0.75em]{45} minutes chronometer.
```

This a  minutes chronometer.

```
%manual insertion
\pictochrono[Height=5cm,ColTime=teal]{33}
```

```
%wihtin a tblr
\begin{tblr}{hlines,vlines,colspec={Q[m,c]Q[8cm,m,j]}}
  \pictochrono[Height=4cm,ColTime=purple]{20}
  &
  \lipsum[1][1-9] \\
\end{tblr}
```
